

SOKOŁÓW S.A. ENERGY POLICY

As the leading producer of meat and meat products in Poland, considering the respect for the environment and conservation of energy, SOKOŁÓW S.A. strives to minimize the negative impact on the environment in its operations through the implementation of the principles of rational energy management.

Awareness of the importance of issues related to the use and consumption of energy in connection with the further development of the company makes the production process run in accordance with applicable laws and standards for energy use and consumption and other local conditions.

Recognising its duty to constantly improve its energy performance, SOKOŁÓW S.A. undertakes to:

- Use energy rationally,*
- Perfect technologies and processes so that their energy efficiency is improved, while maintaining the necessary quality and meeting the stakeholders' demands,*
- To assure accessibility of information and other assets necessary to achieve goals and aims restated to the rational energy management,*
- To conduct activities related to the use of energy in line with the applicable legal rules and other regulations,*
- Support purchasing activities aimed at improving the energy performance,*
- Review and update energy goals and tasks aimed at improving the energy performance,*

We oblige all our employees to identify with the message of this Energy Policy and to achieve the objectives arising therefrom.

The implementation and maintenance of an energy management system compliant with the requirements of the PN-EN ISO 50001:2012 standard is a guarantee of achieving the assumed energy objectives.

The Energy Policy assumptions are known and respected by all employees and its effectiveness is systematically reviewed.
